

UKMTO ADVISORY

023-25 - ELECTRONIC INTERFERENCE

Issue Date:

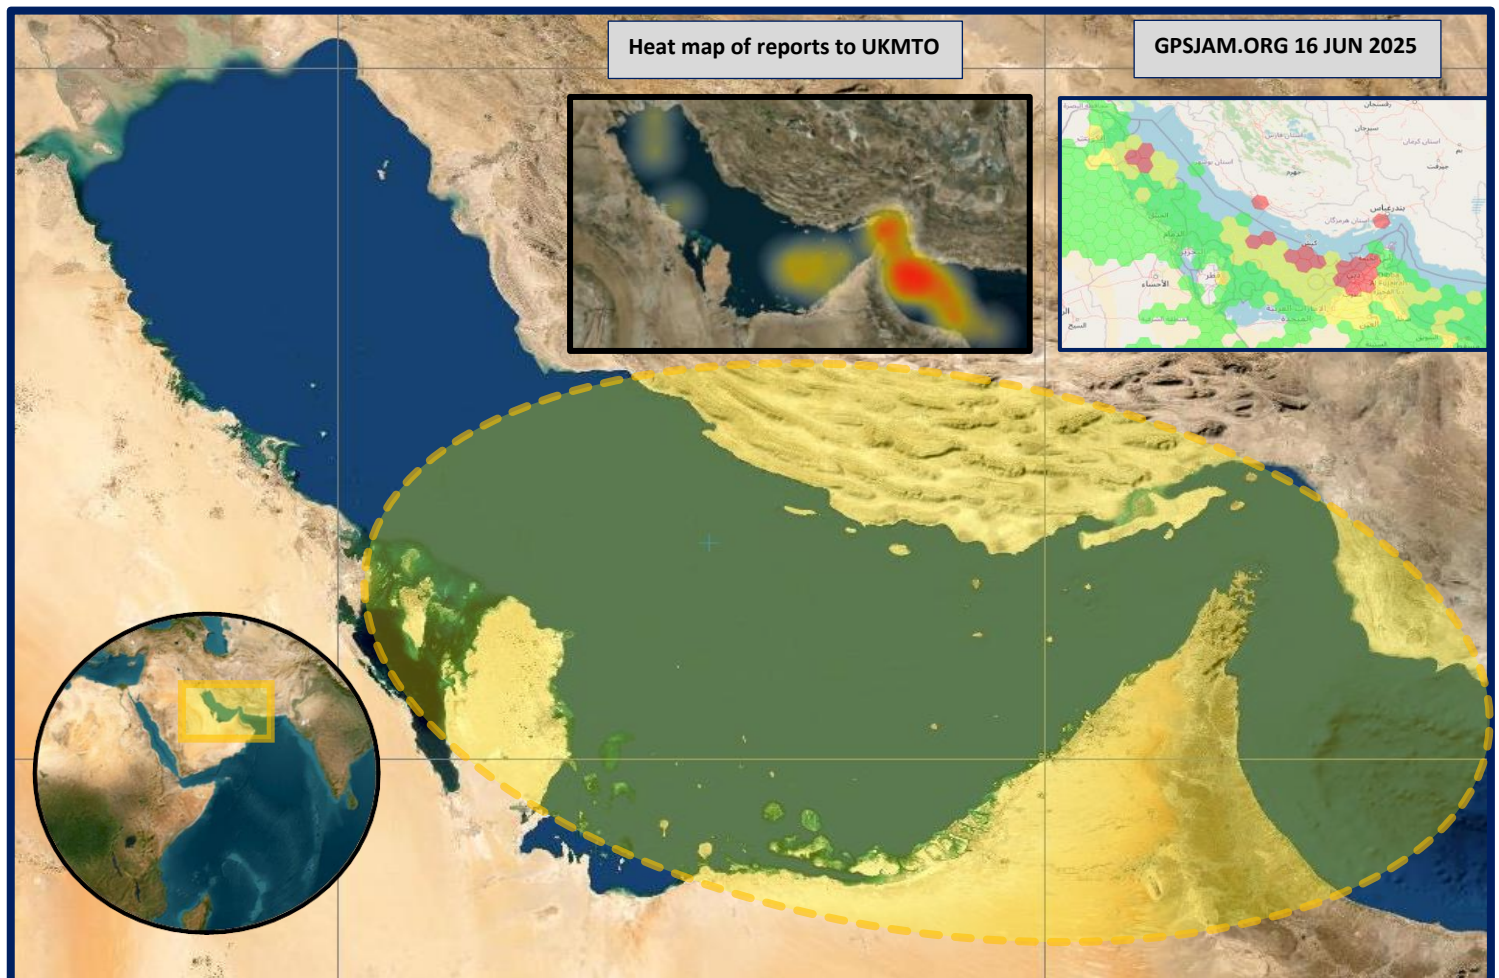

Source

16 Jun 2025

UKMTO

UKMTO has received multiple reports and monitoring of AIS confirms, that there is increasing electronic interference within the waters of the Gulf and Straits of Hormuz. Whilst the level of electronic interference continues to rise across the wider region, the levels and intensity inside the Gulf are having a significant impact on vessels positional reporting through automated systems (AIS).

Vessels are advised to transit with caution and continue to report incidents of electronic interference to the UKMTO.
