### 035-26/UPDATE 001 – ADDITIONAL INFORMATION

UKMTO has been informed that U.S. Naval Forces Central Command (USNAVCENT) has issued an update relating to contraband items prohibited for trade with Iran in connection with the maritime access restrictions currently in effect.

The contraband list and associated enforcement provisions form part of USNAVCENT's blockade implementation framework and are intended to support company security officers, operators, and legal teams in assessing compliance and transit considerations.

UKMTO is not an issuing authority for contraband determinations and does not assess or interpret the applicability of such provisions. Mariners, operators, and CSOs are therefore advised to refer directly to the USNAVCENT / NCAGS publication for authoritative detail.

All requests for clarification relating to contraband definitions, enforcement measures, authorisation requirements, or inspection procedures should be directed to:

[M-BA-NAVCENT-NCAGS@US.NAVY.MIL](mailto:M-BA-NAVCENT-NCAGS@US.NAVY.MIL)

UKMTO will continue to monitor developments and will relay relevant maritime security and navigation information through recognised channels where appropriate.
