# JMIC Weekly Assessment for the Middle East Region

---

## Guidance for Vessels transiting the High Threat Area

Houthi forces have HIGHLY LIKELY paused maritime strikes whilst they continue to monitor the ongoing ceasefire agreement. At ICOD, the Gaza peace pact and overarching ceasefire remain intact. Should the ceasefire collapse entirely then the Houthis would HIGHLY LIKELY return to attacks on Israel, and Israeli affiliated interests.

JMIC continues to monitor reports of suspicious approaches in the region and will issue Information Notes for confirmed pirate activity. No active PAGs are noted at time of this report.

Risk mitigation measures and resources include:

1. BMP-Maritime Security
2. JMIC Bridge Emergency Reference Cards
3. Register for ASPIDES protection via [EUNAVFOR ASPIDES website](#)

## Specific Events

Indian Ocean and Coast of Somalia

- The piracy threat is currently assessed as **LOW** in the Gulf of Aden, Somali Basin and the Indian Ocean.

Arabian Gulf, Strait of Hormuz and Central Red Sea

- **MODERATE** EM interference
- Maintain awareness on small crafts operating in the Bab-al-Mandeb area, but be aware that not all small crafts have hostile intentions. There is a large presence of fishermen operating small crafts in BAM and GoA from Nov to Feb due to Yellowfin Tuna Season.

# CMF Regional Threat Level Assessment

Threat Level	Definition
Low	An attack is highly unlikely
Moderate	An attack is possible but not likely
Substantial	An attack is a strong possibility
Severe	An attack is highly likely
Critical	An attack is almost certain

## CMF Assessment - Other Disruption Threats

Levels of GNSS interference continue to present as **MODERATE** in the Arabian Gulf (AG) and Strait of Hormuz (SoH) throughout the last week.

The concentration of EMI remains **MODERATE** in the Central Red Sea. Vessels transiting this area may observe effects from this interference.

## CMF Assessment - Piracy Threat

The piracy threat is assessed as **LOW** with the North East Monsoon driving increased sea states in the Arabian Gulf and Somali Basin. The presence of foreign fishing vessels (FFVs) operating within the SOM EEZ increases the opportunity for piracy related activities. Hijacked vessels can either be held for ransom, or used as motherships to target FFV further offshore in dense shipping traffic. There are currently no known PAGs in the AOR.

## CMF Assessment - Houthi Threat

The Houthi rhetoric remains the same, stating that they are poised to re-start their campaign against Israel and Israeli interest if they deem the peace plan to have failed. Reaction to recent sanctions has not yet been observed.

The threat level is **MODERATE** for any merchant vessel (MV) or shipping company (incl. fleet) affiliated to Israel (fully/partially owned, flagged, Israeli port calls) when transiting the RS, BAM and GoA, whilst the threat to other non-Israeli affiliated shipping is assessed to be **LOW**.

# CMF Regional Threat Level Assessment

## Key Considerations

Regional tensions have reduced but remain elevated based upon observed sustained high levels of EMI interference in the AG and SoH.

# Electromagnetic Interference

- The heat-mapping graphic indicates the relative levels of electronic interference in the form of AIS anomalies during the period 7<sup>th</sup> – 14<sup>th</sup> January 2026
- Compared to last week's report, levels of electronic interference show a slight increase, especially nearer coastline. However, these are not currently assessed as having a significant impact on ships navigation or safety.
- In the Central Red Sea region, the levels of interference remain from severe to critical. In terms of ports, moderate levels have been observed in the vicinities of Port Sudan, Bandar Abbas, Fujairah, Dubai and Sitra. As per the past few weeks, there continues to be a lack of compliance in direct reporting of such interference events from vessels.
- Vessels are requested to report experience of electronic interference to UKMTO, in support of keeping the broader community better informed.

# Weekly Transits

## Suez

9.4 % Increase in the last week

## Cape of Good Hope (CoGH)

7 % Increase in the last week

- 1 Houthi announcement 27 JULY 2025
- 2 Hamas-Israel ceasefire 10 OCT 2025
- 3 Houthi statement 11 NOV 2025

## Bab al-Mandeb (BAM)

19.75 % Increase in the last week

## Strait of Hormuz (SoH)

8 % Decrease in the last week

\*The statistics presented in this report are based solely on cargo carrying vessels engaged in international trade/transit. This data does not include smaller vessels such as pleasure crafts, yachts, fishing vessels, tugboats, or other types of smaller ships that operate within local or regional waters and are not involved in international shipping.

# Definitions – Incident types

General Categories	Explanatory Notes
<b>Attack (Serious Incident)</b>	The result of a deliberate launching of weapons (i.e missiles, drones), and/or ramming into a vessel that results in serious damage to the vessel. The attack is deemed serious if any resulting damage impacts the vessel's ability to continue functioning, which requires immediate assistance. It includes a vessel deemed a total loss, and significant threat to lives.
<b>Attack (Minor Incident)</b>	The result of a deliberate launching of weapons (i.e missiles, drones), and/or ramming into a vessel that results in minor damage to the vessel. The attack is deemed minor if any resulting damage does not impact the vessel's ability to continue functioning and/or does not require immediate assistance.
<b>Attempted Attack/Targeted</b>	This refers to the act of targeting a vessel with the use of force that results in a miss and no damage to the vessel. <ul style="list-style-type: none"> <li>Any use of force including but not limited to launching of weapons (i.e. missiles, drones), and/or ramming into the vessel.</li> <li>No damage may include but not limited to missile ditching, and/or coalition warships shooting down missiles and/or drones.</li> </ul>
<b>Hijack</b>	Is where attackers have illegally boarded and taken control of a ship against the crew's will.
<b>Suspicious Activities</b>	This refers to any act of activity near the vessel that is enough to warrant suspicion. To include aerial, surface, and subsurface activities.
<b>SOLAS-related Event</b>	A SOLAS event in this terms refers to a major safety related event (Including but not limited to: Fire/Flooding/Capsizing) which is not due to an attack. This is reported by JMIC solely to avoid speculations about if this was a harmful activity towards a merchant vessel or not.
